| Referring Veterinarian: Dr Patrick McHale   | Clinic Name: Seneca Trail Animal Hospital                  |
| Email: mjones@senecatrailanimalhospital.com | Clinic Address: 809 N Jefferson St.<br>Lewisburg, WV 24901 |
|                                             | Phone:                                                     |
|                                             | Fax:                                                       |

## Patient Information

|                                   |                                |
|-----------------------------------|--------------------------------|
| Client: Ward, Jaime               | Tattoo Num:                    |
| Patient Name: Reba                | Patient ID: 32114              |
| Reg. Name: RUMOR HAS IT BY DESIGN | Registration Num: PR28847905   |
| PennHIP Num: 223373               | Microchip Num: 956000017718238 |
| Species: Canine                   | Breed: MINIATURE POODLE        |
| Date of Birth: 29 Aug 2024        | Age: 15 months                 |
| Sex: Female                       | Weight: 11.8 lbs/5.4 kgs       |
| Date of Study: 12 Nov 2025        | Date Submitted: 13 Nov 2025    |
| Date of Report: 13 Nov 2025       |                                |

## Findings

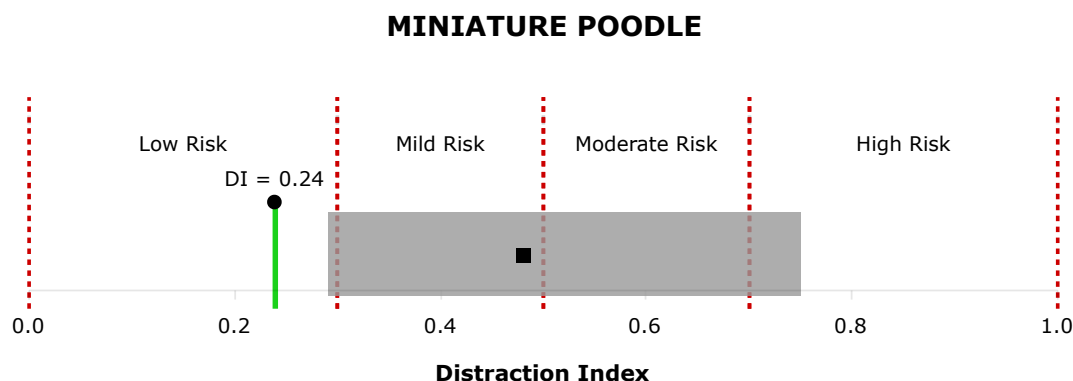

Distraction Index (DI): Right DI = 0.23, Left DI = 0.24.  
 Osteoarthritis (OA): **No radiographic evidence of OA for either hip.**  
 Cavitation/Other Findings: No cavitation present.

## Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.24.

OA Risk Category: The DI is less than or equal to 0.30. This patient is at minimal risk for hip OA.

Distraction Index Chart:

**BREED STATISTICS:** This interpretation is based on a cross-section of 693 canine patients of the MINIATURE POODLE breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.29 - 0.75) for the breed. The breed average DI is 0.48 (solid square). The patient DI is the solid circle (0.24).

**SUMMARY:** The degree of laxity (DI = 0.24) ranks the hip within the tightest 5% of DIs for the breed. This amount of hip laxity places the hip at a minimal risk to develop hip OA. **No radiographic evidence of OA for either hip.**
