Patient Information

Client:	Tattoo Num:
Patient Name: BELLA	Patient ID: 33520
Reg. Name: ALL THE BELLS AND WHISTLES BY DESIGN	Registration Num: PR29840501
PennHIP Num: 229920	Microchip Num: 991003000966521
Species: Canine	Breed: MINIATURE POODLE
Date of Birth: 27 Aug 2025	Age: 7 months
Sex: Female	Weight: 6.6000000000000005
Date of Study: 25 Mar 2026	Date Submitted: 26 Mar 2026
Date of Report: 26 Mar 2026	

Findings

Distraction Index (DI): Right DI = 0.39, Left DI = 0.19.
 Osteoarthritis (OA): **No radiographic evidence of OA for either hip.**
 Cavitation/Other Findings: No cavitation present.

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.39.

OA Risk Category: The DI is between 0.31 and 0.49. This patient is at mild risk for hip OA.

Distraction Index Chart:

BREED STATISTICS: This interpretation is based on a cross-section of 753 canine patients of the MINIATURE POODLE breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.28 - 0.76) for the breed. The breed average DI is 0.48 (solid square). The patient DI is the solid circle (0.39).

SUMMARY: The degree of laxity (DI = 0.39) falls within the central 90% range of DIs for the breed. This amount of hip laxity places the hip at a mild risk to develop hip OA. **No radiographic evidence of OA for either hip.**

Evaluations of Animals less than 12 months of age can be performed for private use of the owner. However, certification will not be possible at this age.

OFA recommends that the test be repeated when the animal reaches 12 months of age.

TEST: BASIC CARDIAC

RESULTS: Normal cardiovascular examination via auscultation - No evidence of congenital or acquired heart disease was noted. Since acquired heart disease may develop later, these evaluation results remain valid for one year, and annual examinations are recommended to continue to monitor cardiac health.

Evaluations of Animals less than 12 months of age can be performed for private use of the owner. However, certification will not be possible at this age.

OFA recommends that the test be repeated when the animal reaches 12 months of age.

TEST: PATELLA

RESULTS: The results of the examination submitted to OFA indicate that no evidence of patellar luxation was recognized.
